Summary

Third-year Computer Science student at Michigan Tech with a minor in cybersecurity. Competent in C#, Java, C, PHP, and SQL, with hands-on experience building full-stack web applications, database systems, and team-based software projects. Seeking a Software Engineering Internship for Summer 2027.

Education

B.S. Computer Science Major, Cyber Security Minor Apr. 2028
Michigan Technological University *Houghton, MI*
GPA: 3.27

Projects

Website Design | *React, Tailwind CSS, Vite* Sep. 2024 – Present

- Built a responsive personal portfolio with React and Tailwind CSS: jeser3535.github.io
- Organized the site into reusable components, including shared navigation and separate Home, About, and Contact pages.
- Configured Vite and GitHub Pages deployment so the site builds and loads from its repository path. S

CS3421 Database Systems | *MySQL, PHP, HTML5, CSS3, SQL* Jan. 2026 – Apr. 2026

- Built a full-stack online store that tracks customer accounts, employee logins, store inventory, and customer orders.
- Designed relational MySQL database tables using primary and foreign keys to store user and checkout data safely.
- Wrote backend PHP scripts and SQL queries to connect the website forms to the database for smooth checkout and updates.
- Created clean front-end web pages using HTML5 and CSS3 so customers and admins can navigate the store easily.

Husky Game Development Enterprise | *Unreal Engine, Blueprints, Unity, C#, Git* Aug. 2025 – Present

- Engineered gameplay mechanics and features for a student-developed video game project.
- Collaborated with a development team for peer support, problem-solving, and feature implementation.
- Utilized Azure DevOps and GitHub for version control and efficient file sharing between team members.
- Worked within project deadlines to deliver milestones in a professional development cycle.

Skills

Languages: C#, Java, HTML/CSS, JavaScript, PHP, C, SQL

Frameworks: React, Tailwind CSS

Developer Tools: Visual Studio, IntelliJ, MARS MIPS Simulator, GitHub, Azure DevOps, Unreal Engine, Unity, Vite

Work Experience

Course Development Support Specialist Feb. 2026 – Apr. 2026
William G. Jackson Center for Teaching and Learning *Houghton, MI*

- Assisted Michigan Tech instructors in constructing and configuring accessible Canvas course sites using institutional design templates and accessibility standards.

Line Cook May 2025 – Aug. 2025
Texas Roadhouse *Fenton, MI*

- Managed cooking and plating while coordinating with the team to fill orders and maintain a clean, safe workspace.
